

## **US-TX-Houston: Solar Electrical Project Manager**

---

Alternative Power Solutions LLC (APS), a growing solar energy design, engineering and installation company, seeks an experienced Solar Electric Project Manager in Houston TX.

We are seeking a well-organized, experienced professional who would like to advance his/her career in a supervisory position managing the construction of solar PV projects. This position requires time spent in an office and in the field. The position will begin managing projects in the Houston region and along the Texas gulf coast. We are seeking a candidate with significant electrical construction and or project management experience.

APS approach to compensating our employees is unique and progressive. We offer a workplace that is casual, upbeat and hard working. We strive for quality workmanship and place a large emphasis on customer satisfaction and education. We promote from within and are looking for career minded individuals, looking to advance in the growing photovoltaic industry. We offer great pay commensurate with experience along with excellent benefits including:

Medical Insurance

Paid holiday, vacation, and sick days

Financial assistance with trade certification and professional development

### **Desired Qualifications:**

- Experience as an installer and/or a project manager for solar PV or electrical systems
- Experience supervising and managing subcontractors in other trades
- Experience managing projects from remote locations
- Experience with public works projects
- Experience working with city and county permitting offices and inspectors
- Strong understanding of electrical design
- Previous project management or electrical construction foreman experience
- Strong leadership skills – ability to organize, utilize and motivate team members quickly to respond to changes in the construction schedule
- Ability to read, understand, and or edit (using CAD) electrical and structural plans
- Good at problem solving and implementing site-specific design modifications
- Strong understanding of electrical wiring, theory and the trade – bending pipe, sizing conduit, sizing wire, working with power distribution centers

- Strong understanding of the NEC Code and the ability to reference the code as required
- Knowledge of Universal Building Codes and building materials and techniques (i.e. lumber, roofing materials, etc.)
- Proficiency on a PC computer in MS Office (Emphasis on Excel, Outlook)
- Positive 'can-do' attitude
- Ability to work long hours as required in order for the installation crews to work to optimal efficiency on a daily basis
- H.S. Diploma required (4-year college degree a plus)
- Must hold a current license as a journeyman electrician
- Minimum of 5+ years of experience in a commercial and /or residential construction environment with a preference being in both

**Position Responsibilities will include but not be limited to:**

- Maintain complicated schedules, develop project timelines, and manage people and materials to complete jobs on schedule.
- Independently manage performance and productivity of APS installation teams and subcontractors
- Set and obtain installation milestone goals
- Mentor staff of solar technicians as required
- Assist the Sales Team with estimating for new projects
- Attend weekly Project Management and Design Meetings
- Coordinate and schedule building inspections

LOCAL applicants only please.

**Must receive electronic (email) copy of resume to be considered**
